Nyrenrode Library off-campus access

When you are at the Nyenrode campus and connected to the Nyenrode network you should have unlimited access to the online Library information sources.

However, when you are off-campus, you need to consider some extra steps which will be explained in this manual.

Please authenticate yourself as a Nyenrode student or staff member and enter your Nyenrode short User logon name (not your Nyenrode E-mail address) and User password:

![Nyenrode Business Universiteit](image)

**Enter your username and password:**

<table>
<thead>
<tr>
<th>User logon name (A\Bcde_xy)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
</tr>
</tbody>
</table>

submit

After authentication the EBSCOhost information source might ask you for credentials. This should not be the case, and your Nyenrode credentials will not be accepted for this external logon.

There are several ways to get around this:

2. Use the ‘Shibboleth Login’ URL. [https://search.ebscohost.com/](https://search.ebscohost.com/). Please find further instructions below.
3. Configure your browsers automatic proxy configuration to enable the off-campus access. Please scroll down and find the instructions below. We can also do this remotely at your convenience if so desired: T +31 346 291288
2. Shibboleth Login

Browse to https://search.ebscohost.com/ and select the [Shibboleth Login] just below the [Login]-button:

Select ‘Netherlands Higher Education’ in the drop-down menu:
Shibboleth Login

To login using your institution's login credentials, select a region or group.

Select your region or group
IPG Media Group
Irish Edugate Federation
Italian Higher Education and Research
Japanese Research and Education - GakuNin
LAWRENCE UNIFIED SCHOOL DIST 497
Legislative Counsel Bureau
Marymede Catholic College
Mathematica Policy Research Inc
MFS
Microsoft-InCommon
Monash
Motorola Solutions Inc
National Economic Research Associates
Netherlands Higher Education
Nike, Inc
Northrise University
Then select ‘Nyenrode Business Universiteit’:

Now you can log on using your Nyenrode credentials.
3. Automatic Proxy Configuration Script

The automatic proxy configuration script enables you to keep using the off-campus access route without having to logon to EBSCOhost.

(Please note, on a managed computer this option might be disabled/unavailable/not working due to administrator restrictions.)

The procedure to configure this setting differs per kind/version/brand of browser. A Google web search with the text “configure automatic proxy configuration for…..” Microsoft Edge, Mozilla Firefox or Google Chrome’ depending on your preferred browser.

(Please note, we are not responsible for issues resulting from a faulty instruction found on the internet, so please be careful and do not use any free tools or programs stating they can assist in this matter.)
Below are the proxy configuration procedures for Microsoft Internet Explorer and Apple Safari:

**Microsoft Internet Explorer**

Open an Internet Explorer Browser and open Internet Options using the Tools menu (Alt+X)

**Go to the Connections tab and open LAN settings:**

![Internet Options](image)

Enter the automatic configuration script URL: [https://auth1.nyenrode.nl/proxy.pac](https://auth1.nyenrode.nl/proxy.pac) *(Please note, when in China, please use: [https://auth1.nyenrode.nl/proxy1.pac](https://auth1.nyenrode.nl/proxy1.pac)))*
Click OK and Apply changes to close Internet Options. Then close all Internet Explorer browsers and/or tabs.

Open new browser to activate the new settings and you should now be able to enter EBSCOhost without the request for credentials using off-campus access.

(Please note, in some cases it is necessary for you to reset and clean the Explorer completely to enable this setting to work. We are not liable for any issues resulting from this reset and cleanup. The impact is usually very low or almost zero. Delete all browsing history, Restore advanced settings and Reset Internet Explorer settings in the Internet options. Then restart the browser and re-configure the automatic proxy configuration as described above.)
Apple Safari

Open Safari
Click Safari > Preferences
Select 'Advanced'
Select 'Proxies: Change Settings...'
The 'System Preferences > Network' window opens. The 'Proxies' button should be highlighted. Click to select if not already highlighted.

Under 'Select a proxy server to configure', select 'Automatic Proxy Configuration' and enter https://auth1.nyenrode.nl/proxy.pac in 'Proxy Configuration File URL:' field.
Select 'Apply Now' to save settings
Close 'Network' window
Close 'Advanced' window
Safari is now configured for Automatic Proxy use.
