

SECURITY STATEMENT

In conjunction with the Computer Emergency Response Team, the Nyenrode Information Security steering group investigates and coordinates security incidents, including data leaks if these involve Nyenrode Business Universiteit's (NBU) staff, contracting parties, students, or systems. That is the case when the cause can be traced internally, but also when external incidents prejudice NBU.

The steering group and the Data Protection Officer give solicited and unsolicited advice to students and staff.

This information does not in any way constitute an invitation to actively test the weaknesses of NBU's systems. NBU carefully attends to that itself. However, your contribution towards jointly safeguarding our clients and systems is appreciated.

Security incidents

If your telephone, laptop, or tablet is missing, or if you come across a data leak, virus infection, phishing e-mail, or other security incident, please report this as soon as possible to the ICT Help Desk at +31 (0)346-291288 or helpdesk@nyenrode.nl.
